## Applications

- Due to high technology automation systems getting increasingly faster in all areas of production and applications, industrial customers are demanding innovative products from the cable industry. Together with our customers SAB BRÖCKSKES is constantly developing and improving our cable track cables to keep this product range up to date. Cable track cables are produced especially for applications with highly flexible bending stress. One of our top products within this product range is our type S 980 P. With UL recognition, CSA and VDE approval this cable reflects the high quality standard of our cable track cables.
- Our highly flexible cables are suitable for constant use with extremely high bending stress during multiple-shift operation. You can use our advanced cable technology in order to enhance the efficiency of your machines and appliances and, therefore, always be one step ahead of your competitors.

### ■ Applications of PVC cable track cables

SAB PVC cable track cables are particularly for flexible use, e.g. as control or data cables in cable tracks installed on machine tools and robot devices, wherever energy supply and signals are transmitted to machines and appliances that are in permanent movement.

#### Exemplary applications:

SD 86/S 86

Wood working and packaging machines, assembly lines, automation plants

SD 86 C/S 86 C

SD 86 C TP

S 900

Wood working and packaging machines, assembly lines, automation plants,  
also for the American market

SD 960 CY/S 960 CY

SD 960 CY TP

S 965 MTW/S 965 MTW CY

### ■ Applications of PUR cable track cables

SAB PUR cable track cables are particularly for continuously flexible use, e.g. as control or data cables in cable tracks installed on industrial robots, automation plants, robot devices, automation systems, mostly where very high flexibility, abrasion resistance, notch resistance, oil and chemical resistance are requested. The cables are suitable for permanent use with millions of bending cycles during multiple-shift operation. The cut resistant and low-adhesion PUR sheath guarantees higher service life and high efficiency.
